

# Youth Justice Indicators Counting Rules and Limitations April 2018

## **Introduction**

The following document provides the counting rules and limitations for each youth justice indicator (YJI) shown in the accompanying report *Youth Justice Indicators Summary Report April 2018*, and EXCEL workbook *Youth Justice Indicators April 2018.xlsx*.

### **YJI 1.1. Offending rates per 10,000 population for children aged 10 to 13 and young people aged 14 to 16**

#### **Counting Rules**

Includes all 10-16 year olds proceeded against during the report period for offending, regardless of the outcome.

Relevant age is age at time of the alleged offence.

Each 10-13 year-old and 14-16 year-old is counted only once in each 12 month period based on the highest seriousness score for all offences within the period.

Where an individual is proceeded against for more than one offence at the same time, and the offences occurred either side of a birthday, age is at the time of the earlier offence.

Where an individual is proceeded against on two separate occasions, once for an offence committed at age 13, and once for an offence committed at age 14, within the same 12 month period, the individual will only be counted in the 10-13 year-old offending rate measure.

Estimated total ethnic and Māori resident populations are extracted from the Statistics New Zealand website ([www.stats.govt.nz/infoshare](http://www.stats.govt.nz/infoshare)) for ages 10-13 and 14-16 respectively as at 30 June of each year.

Populations for Pasifika and European/Other ethnic groups, and by Police District, were estimated by the Ministry of Justice using a combination of estimated total ethnic and Māori resident populations, 2013 Census usually resident populations, and multiple response ethnicity population projections.

#### **Limitations**

A police system change during 2017 may have contributed to a drop in non-court proceedings for 2016/17.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

### **YJI 1.2. Percentage of children and young people who offend whose offending was serious enough to lead to an FGC or court action**

#### **Counting Rules**

Includes any 10-13 and 14-16 year olds proceeded against by Police in a 12 month period against one or more of the following Initial Proceeding Codes:

Value	Description	Value	Description
190	Court action necessary	197	Family Court Orders
191	Prosecution	198	Court Action necessary
192	Prosecution Youth Court and Application for Declaration	231	FGC Youth Justice
193	FGC – Court ordered	232	FGC – s247(b) Police referred
194	FGC – s247(d) Youth Court referred	233	FGC – 14 (1)(e) Child offending
196	Family Court – s 14(1)(e)		

Relevant age is age at time of the alleged offence.

Each 10-13 and 14-16 year-old is counted only once in each 12 month period based on the highest seriousness score for all offences within the period.

Where an individual is proceeded against for more than one offence at the same time, and there are offences that occurred either side of a birthday, the relevant age is the age at time of the earlier offence.

### **Limitations**

Because the total number of 10-13 year olds not receiving an alternative action or caution/warning is small, fluctuations in the measure for 10-13 year olds may not be indicative of any trend or change within the system. The effect of a small total number of data points will be exacerbated in the disaggregated data, and may limit the extent to which some subgroup analyses can be presented.

A police system change during 2017 may have resulted in a drop in non-court proceedings for 2016/17. This may have caused some of the increase in the percentage of children who offend whose offending was serious enough to lead to an FGC or court action from 2015/16 to 2016/17.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **YJI 1.3. Offending rates per 10,000 population for young people aged 14 to 16 relative to young adults aged 17 to 20 years**

### **Counting Rules**

Includes any 14-20 year olds proceeded against during the report period for offending, regardless of the outcome.

Relevant age is age at time of the alleged offence.

Each 14-16 year-old and 17-20 year-old is counted only once in each 12 month period based on the highest seriousness score for all offences within the period.

Where an individual is proceeded against for more than one offence at the same time, and the offences occurred either side of a birthday, age is the age at time of earlier offence.

Where an individual is proceeded against on two separate occasions, once for an offence committed at age 16, and once for an offence committed at age 17, within the same 12 month period, the individual will only be counted in the 14-16 year-old offending rate measure.

Estimated total ethnic and Māori resident populations are extracted from the Statistics New Zealand website ([www.stats.govt.nz/infoshare](http://www.stats.govt.nz/infoshare)) for ages 14-16 and 17-20 respectively as at 30 June of each year.

Populations for Pasifika and European/Other ethnic groups, and by Police District, were estimated by the Ministry of Justice using a combination of estimated total ethnic and Māori resident populations, 2013 Census usually resident populations, and multiple response ethnicity population projections.

### **Limitations**

A police system change during 2017 may have contributed to a drop in non-court proceedings for 2016/17.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **YJI 1.4. Total number of proceedings for 10-13 and 14-16 year olds and the average number of proceedings per offender in each age group**

### **Counting Rules**

Includes any 10-16 year olds proceeded against during the report period for offending, regardless of the outcome.

Relevant age is age at time of the alleged offence.

For the numerators, each time a 10-13 year-old or 14-16 year-old has a proceeding against them is counted as a proceeding.

For the denominator for average number of proceedings, a 10-13 year-old and 14-16 year-old is counted only once in each 12 month period based on the highest seriousness score for all offences within the period.

Where an individual is proceeded against for more than one offence at the same time, and the offences occurred either side of a birthday, age is the age at time of earlier offence.

Where an individual is proceeded against on two separate occasions, once for an offence committed at age 13, and once for an offence committed at age 14, within the same 12 month period, the individual will be counted in both the 10-13 year-old and 14-16 year-old measures.

Estimated total ethnic and Māori resident populations are extracted from the Statistics New Zealand website ([www.stats.govt.nz/infoshare](http://www.stats.govt.nz/infoshare)) for ages 10-13 and 14-16 respectively as at 30 June of each year.

Populations for Pasifika and European/Other ethnic groups, and by Police District, were estimated by the Ministry of Justice using a combination of estimated total ethnic and Māori resident populations, 2013 Census usually resident populations, and multiple response ethnicity population projections.

### **Limitations**

Small numbers of high-rate offenders will skew the measure.

A police system change during 2017 may have contributed to a drop in non-court proceedings for 2016/17.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **YJI 1.5 Percentage of 10 to 13 and 14 to 16 year olds proceeded against who had no proceedings in the two years prior**

### **Counting Rules**

Includes any 10-16 year olds proceeded against during the report period for offending, regardless of the outcome.

Relevant age is age at time of the alleged offence.

For the numerator, counts only 10-16 year olds proceeded against by the Police with no proceedings in the previous 2 years.

For the denominator, a 10-13 year-old and 14-16 year-old is counted only once in each 12 month period based on the highest seriousness score for all offences within the period..

Where an individual is proceeded against for more than one offence at the same time, and the offences occurred either side of a birthday, age is the age at time of earlier offence.

Where an individual is proceeded against on two separate occasions, once for an offence committed at age 13, and once for an offence committed at age 14, within the same 12 month period, the individual will only be counted in the 10-13 year-old measure.

### **Limitations**

As the proceedings data only commenced on 1 July 2009, it is not currently possible to provide accurate information on the base measure for this YJI - the percentage of first-time offenders. Rather, as interim measures, this report contains the proportions of 10-13 and 14-16 year olds proceeded against with no previous proceedings in the 2 years prior.

A police system change during 2017 may have contributed to a drop in non-court proceedings for 2016/17.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **YJI 1.6. Proportion of 10-13 and 14-16 year olds referred for a FGC who have previously been the subject of a report of concern to Oranga Tamariki relating to their care and protection**

### **Counting Rules**

Section 2(2) of the Children, Young Persons, and their Families Act 1989 states that jurisdiction for proceeding against a child or young person is based on the person's age when they allegedly offended. Individuals who offend when aged 14 to 16 years (inclusive) are referred to as 'young people'. Some of these youth turn 17 years (or older) by the time they are proceeded against (such as with a youth justice FGC), but they are still covered by Section 2(2).

Youth justice FGCs include: child offender FGCs, intention-to-charge FGCs, and court-ordered FGCs.

Each 10-13 year-old and 14-16 year-old is counted only once in each 12 month period based on their date of their first youth justice FGC.

Relevant age is at the time of the child or young person's FGC as offence date is not always recorded on Oranga Tamariki data.

Where an individual has two youth justice FGCs within the same 12 month period, the first at age 13, and the second at age 14, the individual will only be counted in the 10-13 year-old measure.

Section 15 reports of concern are over people's entire childhoods until the FGC, rather than just in the same 12 month period as the FGCs.

### **Limitations**

Only a minority of reports of concern proceed to an investigation or a Child or Family Assessment, and then result in substantiated findings of abuse or neglect. Also, not all reports of concern to Oranga Tamariki relate to possible abuse or neglect. Some are due to other concerns such as the child showing suicide tendencies, or exhibiting behavioural difficulties that the parents or caregivers are struggling to deal with. Caution should therefore be taken in interpreting all children who have had a report of concern as having had "negative childhood experiences".

Levels of reporting of child abuse or neglect can be affected by a number of things. For example, the extent of publicity around campaigns such as "It's Not OK" (i.e. increased publicity can lead to increased reporting). Also, actions taken through the Children's Action Plan may increase the reporting of concerns to Oranga Tamariki about care and protection for children and young people, by raising awareness of child abuse. In the short term, this means that the proportion of children and young people referred for a youth justice FGC who have previously been the subject of a report of concern to Oranga Tamariki due to concerns about their care and protection may increase.

The total number of 10-13 year olds receiving a youth justice FGC is relatively small, while those who have previously been the subject of a report of concern to Oranga Tamariki in relation to their care and protection will be smaller. Therefore, fluctuations in these measures may not be indicative of any trend or change within the system. The effect of a small total number of data points will be exacerbated in the disaggregated data, and may limit the extent to which some subgroup analyses can be presented.

Offence type is not always collected for FGCs, so no breakdowns are presented for this measure according to offence type or seriousness.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **YJI 2.1. The percentage of 14-16 year olds proceeded against who appear in the Youth Court**

### **Counting Rules**

The numerator includes only those young people aged 14-16 at the time of the alleged offence, and whose first court appearance was in a Youth Court. Where a young person has appeared in District Court or High Court and there is no YJNMDS record showing an appearance in Youth Court, the first District Court or High Court appearance should be counted as if it were a Youth Court appearance. If the first District Court appearance has the same charge reference as the first High Court appearance, only the first District Court appearance is counted.

The denominator includes any 14-16 year old proceeded against for offending, regardless of the outcome.

Each 14-16 year-old is counted only once in each 12 month period.

Relevant age is age at time of the alleged offence.

Where an individual is proceeded against for more than one offence at the same time, and the offences occurred either side of a birthday, age is the age at time of earlier offence.

First court appearances are based on day of first appearance in the Youth Court for one charge or a group of charges.

### **Limitations**

This indicator is not produced for children aged 10-13 years as prosecution is rare for them.

A police system change during 2017 may have contributed to a drop in non-court proceedings for 2016/17. This may have caused some of the increase in the percentage of offenders in the Youth Court from 2015/16 to 2016/17.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **YJI 2.2. The population-adjusted rate of 14-16 year olds who appear in the Youth Court**

### **Counting Rules**

Includes only those young people aged 14-16 at the time of the alleged offence, and whose first court appearance was in a Youth Court. Where a young person has appeared in District Court or High Court and there is no YJNMDS record showing an appearance in Youth Court, the first District Court or High Court appearance should be counted as if it were a Youth Court appearance. If the first District Court appearance has the same charge reference as the first High Court appearance, only the first District Court appearance is counted.

Relevant age is age at time of the alleged offence.

First court appearances are based on day of first appearance in the Youth Court for one charge or a group of charges.

For example:

- a 17 year-old appears 3 times in Youth Court during a 12 month period for a set of 3 charges committed when they were 16. This is counted as 1 appearance.
- a 15 year-old appears in Youth Court twice in a single month for 2 different charges. This is counted as 2 appearances.
- a 15 year-old appears in Youth Court during the latest 12 month period for a charge first heard by the Youth Court during the previous 12 month period. This is counted in the previous 12 month period, and not in the latest 12 month period.

Estimated total ethnic and Māori resident populations are extracted from the Statistics New Zealand website ([www.stats.govt.nz/infoshare](http://www.stats.govt.nz/infoshare)) for ages 10-13 and 14-16 respectively as at 30 June of each year.

Populations for Pasifika and European/Other ethnic groups, and by Police District, were estimated by the Ministry of Justice using a combination of estimated total ethnic and Māori resident populations, 2013 Census usually resident populations, and multiple response ethnicity population projections.

### **Limitations**

This indicator is not produced for children aged 10-13 years as prosecution is rare for them.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **YJI 3.1. The proportion of 16-year-old offenders who appeared in the Youth Court, and were proven to have reoffended in an adult court within 12 and 24 months**

### **Counting Rules**

The numerator for the 12 month measure includes only those individuals aged 16 who were proved in the Youth Court to have offended in a 12 month period, and who were proved in

an adult court to have reoffended for a new offence committed at ages 17 or 18, within 12 months of the outcome date of the first Youth Court proved case. Breaches of custodial and community-based orders (ANZSOC codes 1511-1529) are not included as reoffending.

The numerator for the 24 month measure includes those individuals aged 16 who were proved in the Youth Court to have offended in a 12 month period, and who were proved in an adult court to have reoffended for a new offence committed at ages 17 to 19, within 24 months of the outcome date of the first Youth Court proved case. Breaches of custodial and community-based orders (ANZSOC codes 1511-1529) are not included as reoffending.

Only the most serious new offence for each individual is counted, with seriousness determined by the most serious penalty imposed. If no penalty was imposed then seriousness is determined by most serious charge outcome.

The denominator for the 12 month measure includes the number of 16 year olds who were proved in the Youth Court to have offended within a given 12 month period. Counts only their first proved case during each 12 month period.

The denominator for the 24 month measure includes the number of 16 year olds who were proved in the Youth Court to have offended within a given 12 month period. Counts only their first proved case during each 12 month period.

Only imprisonable offences are included in both the numerators and denominators.

Relevant age is age at time of offence.

There needs to be some allowance for crimes to be detected and processed (that is, proved in court) after the follow-up duration of interest. Otherwise measures may be non-comparable because of changes in speed of processing of young people by Police and Courts. The rule used here is:

- to include all offences which are proven in court within 18 months of the outcome date of the first Youth Court proved case for calculating 12 month reoffending rates; and,
- to include all offences which are proven in court within 30 months of the outcome date of the first Youth Court proved case for calculating 24 month reoffending rates.

For example:

- A young person is proved in the Youth Court on 1 June 2012 to have offended for an offence committed at age 16, and commits an offence on 1 May 2013 at age 17, which was proved on 12 November 2013 in an adult court. This will be counted in both the numerators and denominators for the 12 and 24 month reoffending rates for 2012.
- A young person is proved in the Youth Court on 1 June 2012 to have offended for an offence committed at age 16, and commits an offence on 1 May 2013, which was proved on 1 March 2014 in an adult court. This will be counted in both the numerator and denominator for the 24 month reoffending rates for 2012, but only for the denominator for the 12 month reoffending rates for 2012, as it was not proved until over 18 months past the first Youth Court case.
- A young person is proved in the Youth Court on 1 June 2012 to have offended for an offence committed at age 16, and commits another offence on 1 January 2013 at age 16, which was proved on 19 March 2013 in the Youth Court. They subsequently did not

appear in court until aged 20. This will be counted in only the denominators for the 12 and 24 month reoffending rates for 2012 as the offender was still a youth when committing the latter offence.

- A young person is proved in the Youth Court on 1 June 2012 to have offended for an offence committed at age 16, and is charged with an offence they allegedly committed on 1 May 2013 as a 17 year old. However, the offence was not proved in a court, so this will be counted in only the denominators for the 12 and 24 month reoffending rates for 2012.

### **Limitations**

This measure is focused on the youth justice system's success with young people who offend at most risk of criminal behaviour as young adults, and so looks only at those young people who offend who appear in the Youth Court. This excludes a high proportion of young people who offend who are not prosecuted at age 16, as well as those who appear in the adult court for solely a non-imprisonable traffic charge.

Because this measure focuses on 17-19 year olds who previously appeared in the Youth Court as 16 year olds, it will miss offenders who appeared in the Youth Court at age 15 or below, but did not appear as 16 year olds. It will also miss young people who offend who were proved to have offended in the Youth Court at age 16 but did not begin reoffending until age 19 for the 12 month measure, and age 20 for the 24 month measure. As noted above, it will also miss 16 year-olds whose resolution did not involve prosecution, and who offended as 17 year olds.

The measure will be reporting on decisions made by the youth justice system between 18 and 42 months earlier. It will not, therefore, provide real time information on the effect of changes in the system.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **YJI 3.2. The proportion of 14 to 16-year-old offenders who appeared in the Youth Court, and were proven to have reoffended in any court within 12 and 24 months**

### **Counting Rules**

The numerator for the 12 month measure includes those individuals aged 14-16 who were proved in the Youth Court to have offended in a 12 month period, and who were proved in any court to have reoffended for a new offence committed within 12 months of the outcome date of the first Youth Court proved case. Breaches of custodial and community-based orders (ANZSOC codes 1511-1529) are not included as reoffending.

The numerator for the 24 month measure includes those individuals aged 14-16 who were proved in the Youth Court to have offended in a 12 month period, and who were proved in any court to have reoffended for a new offence committed within 24 months of the outcome date of the first Youth Court proved case. Breaches of custodial and community-based orders (ANZSOC codes 1511-1529) are not included as reoffending.

Only the most serious new offence for each individual is counted, with seriousness determined by the most serious penalty imposed. If no penalty was imposed then seriousness is determined by most serious charge outcome.

The denominators for both measures include the number of 14-16 year olds who were proved in the Youth Court to have offended within a given 12 month period. Counts only their first proved case during each 12 month period.

Only imprisonable offences are included in both the numerators and denominators.

Relevant age is age at time of offence.

There needs to be some allowance for crimes to be detected and processed (that is, proved in court) after the follow-up duration of interest. Otherwise measures may be non-comparable because of changes in speed of processing of young people by Police and Courts. The rule used here is:

- to include all offences which are proven in court within 18 months of the outcome date of the first Youth Court proved case for calculating 12 month reoffending rates; and,
- to include all offences which are proven in court within 30 months of the outcome date of the first Youth Court proved case for calculating 24 month reoffending rates.

For example:

- A young person is proved in the Youth Court on 1 June 2012 to have offended for an offence committed at age 16, and commits an offence on 1 May 2013, which was proved on 12 November 2013 in an adult court. This will be counted in both the numerators and denominators for the 12 and 24 month reoffending rates for 2012.
- A young person is proved in the Youth Court on 1 June 2012 to have offended for an offence committed at age 14, and commits an offence on 1 May 2013, which was proved on 1 March 2014 in the Youth Court. This will be counted in both the numerator and denominator for the 24 month reoffending rates for 2012, but only for the denominator for the 12 month reoffending rates for 2012, as it was not proved until over 18 months past the first Youth Court case.
- A young person is proved in the Youth Court on 1 June 2012 to have offended for an offence committed at age 16, and is charged with an offence they allegedly committed on 1 May 2013. However, the offence was not proved in a court, so this will be counted in only the denominators for the 12 and 24 month reoffending rates for 2012.

### **Limitations**

This measure is focused on the youth justice system's success with dealing with the most serious and/or persistent young people who offend, that is, those who were proved to have offended in the Youth Court. This group of youth is most at risk of reappearing in the Youth Court and/or entering the adult court system. Therefore, the measures exclude a high proportion of young people who offend who are never prosecuted and those who appear in the adult court for solely a non-imprisonable traffic charge.

The measure will be reporting on decisions made by the youth justice system between 18 and 42 months earlier. It will not, therefore, provide real time information on the effect of changes in the system.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

#### **YJI 4.1. The proportion of 12-16 year olds appearing in the Youth Court who are remanded into custody**

##### **Counting Rules**

Each 12-16 year-old is counted only once in each 12 month period based on their date of their first remand admission into the custody of the Chief Executive of Oranga Tamariki. Some of these young people will have turned 17 years (or older) by the time they appear in court.

For the numerator, age is at the time the child/young person was first remanded into custody in each 12 month period.

For the denominator, age is at the time the child/young person first appeared in court in each 12 month period.

##### **Limitations**

The indicator takes no account of the overall time spent on remand and the total number of remand episodes during each 12 month period. For example, the indicator may show that the proportion of 12-16 year olds appearing in the Youth Court who are remanded decreased from one 12 month period to the next. However, if the average time spent on remand and the average number of remand episodes per person both increased over this period, this indicator will not provide this information.

Changes in numbers/rates for Pasifika should be viewed with caution due to relatively small numbers and changes in the recording of ethnicity over time.

## **Ethnicity**

For individuals in the Youth Justice National Minimum Dataset with multiple ethnicities, a single prioritised ethnicity has been assigned, prioritised in the order:

- Māori
- Pasifika
- Asian
- MELAA (Middle Eastern, Latin American, or African)
- Other
- European
- Unknown.

Individuals with a prioritised ethnicity of Asian, MELAA, European or Other have been classified into the European/Other ethnic group.

## Seriousness Scores

This report groups offences by seriousness scores to support comparative analysis. The Justice Sector Seriousness Scale contains seriousness scores for all offences. The scores represent the seriousness of an offence based on the actual sentences that are imposed for that offence. The report uses scores which were updated by the Ministry of Justice in February 2017.

**Table 1: Seriousness bands and scores**

Seriousness band	Seriousness score
Low	0 - 14
Low-Medium	>14 - 30
Medium	>30 - 160
Medium –High	>160 - 380
High	More than 380

**Table 2: Examples of offences and their seriousness scores**

Offence	Seriousness
Murders (Manually)	12,045
Males Rapes Female Over 16	3,627
Wounds Intent To Gbh (Manually)	1,991
Aggravated Robbery (Firearm)	1,583
Burgles (Other Property) Est Val Over \$5000 By Day	429
Sell/Give/Supply/Administer/Deal Cannabis Plant	346
Burgles (Other Property) Est Val \$500 To \$5000 By Night	290
Burgles (Other Property) Est Val Under \$500 By Day	245
Assaults With Intent To Injure (Manually)	178
Unlawful Takes Motor Vehicles (Motor Cars/Trucks Etc)	177
Attempted Conversion of Vehicle Or Other Conveyance	136
Theft (Over \$1,000)	129
Unlawful Interferes Motor Vehicles (Motor Cars/Trucks Etc)	82
Theft (Under \$500)	25
Shopliffts (Est Val Under \$500)	19
Wilful Trespass	13
Common Assault (Manually)	12
Unlicensed Driver Failed To Comply With Prohibition	2.5
Careless Driving	1.4

**Table 3: Most common offences by young people within each ANZSOC offence division**

<b>ANZSOC Offence Division</b>	<b>Shortened name</b>	<b>Most common offences for young people in court</b>
Homicide and related offences	Homicides	Murder; Manslaughter; Drove dangerously causing death
Dangerous or negligent acts endangering persons	Causing injury	All minor, serious and grievous assaults (with common assault being the most frequent)
Sexual assault and related offences	Sexual offences	Indecent assault; unlawful sexual connection; doing an indecent act; rape
Dangerous or negligent acts endangering persons	Dangerous acts	Dangerous, careless or reckless driving; sustained loss of traction
Abduction, harassment and other offences against the person	Abductions	Behave or speak threateningly; threaten to kill or do grievous bodily harm
Robbery, extortion and related offences	Robbery, extortion	Aggravated robbery; robbery; assault with intent to rob; demands to steal
Unlawful entry with intent/burglary, break and enter	Unlawful entry, burglary	Burglary
Theft and related offences	Theft	All types of theft (with shoplifting being the most frequent); unlawfully takes or gets into a motor vehicle; receiving stolen property
Fraud, deception and related offences	Deceptions	Take, obtain or use a document or credit card for pecuniary advantage; obtain by deception
Illicit drug offences	Illicit drugs	Possess cannabis or drug-related utensils; using cannabis
Prohibited and regulated weapons and explosives offences	Weapon offences	Possess offensive weapon or knife
Property damage and environmental pollution	Property damage	Wilful damage including graffiti-related offences; unlawfully interfere with motor vehicles; intentional damage; arson
Public order offences	Public disorder	Wilful trespass; disorderly behaviour; unlawfully in an enclosed yard, area or building; fighting in a public place; possessing instruments for car conversion; possessing instruments for graffiti
Traffic and vehicle regulatory offences	Road traffic	Driving with excess alcohol; driving while disqualified
Offences against government procedures, government security and government operations	Against justice	Escaping lawful custody; resisting police; breach of bail; obstructing police; failing to furnish name and address
Miscellaneous offences	Miscellaneous	Used a telephone for a fictitious purpose, plus various other offences not included in the categories above
